The Honorable Alfred Sikes  
Chairman  
Federal Communications Commission  
1919 M Street N.W.  
Washington, D.C. 20554

Dear Chairman Sikes:

I am writing to you on behalf of Ritron, Inc., a company in Carmel, Indiana, that specializes in handheld transceivers. They have serious concerns regarding PR Docket No. 92-235 and its affect on their industry.

I understand that the objective of PR Docket No. 92-235 is to increase the number of useable frequencies. Unfortunately, this proposal would make obsolete almost all of the professional two-way radios used in the U.S. Currently, the number of businesses as well as police cars, ambulances, and emergency vehicles that would be affected, is in the millions.

I have been informed that there are other options available that could increase the number of usable frequencies without passing the costs on to the taxpayers and the hundreds of thousands of businesses and cities that would be affected by this ruling. My constituent and others have asked that PR Docket No. 92-235, or any other drastic changes to the existing rules, be postponed until a more orderly transition can be designed. I believe this to be a reasonable request, and I would appreciate a response from the FCC on their ruling.

I hope you will take into consideration the consequences such a decision could have on the private sector and many businesses in the U.S. If you have any further questions, please contact me at 225-2276.

Sincerely,

Dan Burton  
Member of Congress
